

ROBEL HAILU WOLDESENBET

Full-Stack Developer | Node.js, React / Next.js, Go, Laravel, PostgreSQL

+251 986 991 447 | robiiihailuu@gmail.com | Addis Ababa, Ethiopia | linkedin.com/in/mr-robel-hailu-854143239/

PROFILE

Full-stack developer with over three years of production experience across frontend and backend, including three years of fully remote work. Currently the sole owner of a production lending platform at Kifiya Financial Technology, covering backend microservices, frontend, database and releases; the platform has facilitated around 200,000 loans worth approximately 15 billion ETB through integrations with partner banks. Experienced with JavaScript (Node.js, React, Next.js), Go, PHP/Laravel, PostgreSQL and MySQL, building REST APIs and third-party integrations. Used to working independently, owning problems through to resolution, translating business requirements into working software, and learning new technologies quickly.

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER & PLATFORM OWNER, IDD TEAM

May 2026 – Present

Kifiya Financial Technology

- Sole owner of the production loan platform, developing and maintaining backend services, frontend, database and service architecture end to end
- Delivered Version 2 of the platform independently while keeping the live system running, with direct responsibility for uptime, data integrity and release quality
- Designed and built microservices including an activity log service and a notification service, defining service boundaries, event flow and integration with core platform services
- Build and maintain APIs and integrations with partner banks' lending platforms, so that approved loans are disbursed directly to farmers and other underserved borrowers
- Investigate and resolve production incidents, bugs and operational requests, and translate the requirements of banks, partners and business teams into technical solutions
- Contribute to the credit scoring model and model-driven loan products (shoat fattening, apiculture, poultry, medium working capital) delivered through the platform

SENIOR PLATFORM ADMINISTRATOR (SENIOR ASSOCIATE), MCP TEAM

Jan 2026 – Present

Kifiya Financial Technology

- Support loan processing workflows across multiple banks, NGOs and financial institutions on a high-volume platform within a financial inclusion initiative supported by the Mastercard Foundation
- Own production platform operations, including system monitoring, incident handling, database operations and continuous availability of financial workflows
- Responsible for the integrity and consistency of large-scale loan and participant data that lending decisions depend on

SENIOR FULL STACK DEVELOPER (REMOTE)

Feb 2023 – Apr 2026

Elisoft Technology

- Joined as a junior full stack engineer and progressed to senior-level responsibilities through continuous delivery across production projects, working fully remotely alongside university studies
- Built and maintained full stack applications across frontend and backend, contributing to database design, REST API development and system optimization in production environments
- Delivered Inventory, HR and core business workflow modules for an ERP platform, including integration with external systems such as POS

DATA ANALYST & JUNIOR ERP CONSULTANT

Jul 2025 – Jan 2026

ESIG Ethiopia Sugar Company

- Gathered requirements on site and mapped real factory workflows into ERP system requirements and structured technical specifications
- Analyzed, cleaned and structured operational data for ERP integration and reporting, working between development teams, stakeholders and consultants

SOFTWARE DEVELOPER INTERN

Mar 2024 – Sep 2024

EagleLion System Technology

- Contributed to a task management system across frontend and backend alongside the engineering team
- Worked in Agile delivery with sprint planning, standups, code reviews and version control, building habits of clean, collaborative development

KEY PROJECTS

LENDING PLATFORM (KIFIYA)

Go, Node.js, Next.js, Microservices, Kafka, Redis, PostgreSQL, AWS, Bank Integrations

- Production full-stack lending platform that has facilitated around 200,000 loans worth approximately 15 billion ETB
- Event-driven microservice backend with a Next.js frontend, integrated with partner banks' lending platforms for direct disbursement with accurate, consistent data flow under production load

ERP SYSTEM DEVELOPMENT: HR, FINANCE, INVENTORY MODULES

Laravel, Filament, CodeIgniter, Node.js, MySQL, PostgreSQL, REST APIs, Database Design

- Designed and delivered core ERP modules covering HR, finance and inventory, including backend logic, database structures and API integrations for workflow automation

OTHER PROJECTS

Full-stack and AI-powered applications

- E-learning platform and Telegram bot automation, built alongside professional work to deepen full stack and system design practice
- AI-powered CV tool, RAG-based experiments, and a personalized recommendation system with a university news feed (final year project)

SKILLS

Frontend: JavaScript, React, Next.js

Backend: Node.js, Go (Golang), PHP / Laravel, Filament, CodeIgniter, REST API Design & Integration, Microservices, Event-Driven Systems, Kafka, Redis

Databases: PostgreSQL, MySQL, Database Design, Query Optimization, Data Integrity Management

Delivery & Operations: Version Control, Code Reviews, CI/CD, AWS, System Monitoring & Incident Handling, Debugging, Agile Delivery

Ways of Working: Independent remote work, End-to-end ownership, Requirements translation, Stakeholder & client communication (banks, NGOs, partners), AI-assisted development workflows

Additional: RAG, Recommendation Systems, Credit Scoring Models, Reporting (Metabase, Power BI, Excel)

EDUCATION

BSc, Software Engineering | GPA 3.84

Arba Minch University, Ethiopia

2020 – 2025

ADDITIONAL

Languages: Amharic (Native), English (Professional working proficiency)

Volunteering: Charity Leadership & First Aid Volunteer, AMU Charity (2022 to 2025), certified for leadership in outreach programs focused on education and social impact
