ROBEL HAILU WOLDESENBET

Platform Engineer | Fintech Lending, ERP & AI/ML Systems

+251 986 991 447 | robiiihailuu@gmail.com | Addis Ababa, Ethiopia | linkedin.com/in/mr-robel-hailu-854143239/

PROFILE

Platform engineer with nearly four years of production experience building fintech lending, ERP and AI-driven systems. Currently the sole owner of a production loan participant management platform at Kifiya Financial Technology, responsible for backend microservices, frontend, database and releases; the platform has facilitated around 200,000 loans worth approximately 15 billion ETB through integrations with partner banks. Contributes to the credit scoring model behind the platform's lending products and builds RAG-based and recommendation systems, backed by an ongoing MSc in Artificial Intelligence. Brings hands-on ERP experience from development through implementation across HR, finance and inventory. Skilled in Node.js, React / Next.js, Go, PHP / Laravel, PostgreSQL and MySQL, with a track record of owning systems end to end and turning business requirements into reliable software.

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER & PLATFORM OWNER, IDD TEAM

May 2026 – Present

Kifiya Financial Technology

- Sole owner of the production loan participant management platform, developing and maintaining backend services, frontend, database and service architecture end to end
- Delivered Version 2 of the platform independently while keeping the live system running, with direct responsibility for uptime, data integrity and release quality
- Designed and built 2 new microservices, an activity log service and a notification service, defining service boundaries, event flow and integration with core platform services
- Build and maintain APIs and integrations with partner banks' lending platforms, so that approved loans are disbursed directly to farmers and other underserved borrowers
- Investigate and resolve production incidents, bugs and operational requests, and translate the requirements of banks, partners and business teams into technical solutions
- Contribute to the credit scoring model and 4 model-driven loan products (shoat fattening, apiculture, poultry, medium working capital) delivered through the platform

SENIOR PLATFORM ADMINISTRATOR (SENIOR ASSOCIATE), MCP TEAM

Jan 2026 – Present

Kifiya Financial Technology

- Support loan processing workflows across multiple banks, NGOs and financial institutions on a high-volume platform within a financial inclusion initiative supported by the Mastercard Foundation
- Own production platform operations, including system monitoring, incident handling, database operations and continuous availability of financial workflows
- Responsible for the integrity and consistency of large-scale loan and participant data that lending decisions depend on

SENIOR FULL STACK DEVELOPER & ERP IMPLEMENTOR (REMOTE)

Feb 2023 – Apr 2026

Elisoft Technology

- Joined as a junior full stack engineer and progressed to a senior role within 3 years through continuous delivery across production projects, working fully remotely alongside university studies
- Built and maintained full stack applications across frontend and backend, contributing to database design, REST API development and system optimization in production environments
- Delivered 3 core ERP modules (Inventory, HR and business workflow), including integration with external systems such as POS
- Implemented the ERP for client organizations with around 150 active users, configuring modules to fit their business processes and supporting users through rollout and go-live

DATA ANALYST & ERP CONSULTANT

Jul 2025 – Jan 2026

ESIG Ethiopia Sugar Company

- Gathered requirements on site and mapped real factory workflows into ERP system requirements and structured technical specifications
- Analyzed, cleaned and structured operational data for ERP integration and reporting, working between development teams, stakeholders and consultants

SOFTWARE DEVELOPER INTERN

Mar 2024 – Sep 2024

EagleLion System Technology

- Contributed to a task management system across frontend and backend alongside the engineering team
- Worked in Agile delivery with sprint planning, standups, code reviews and version control, building habits of clean, collaborative development

KEY PROJECTS

LOAN PARTICIPANT MANAGEMENT PLATFORM (KIFIYA)

Go, Node.js, Next.js, Microservices, Kafka, Redis, PostgreSQL, AWS, Bank Integrations

- Production full-stack loan participant management platform that has facilitated around 200,000 loans worth approximately 15 billion ETB
- Event-driven microservice backend with a Next.js frontend, integrated with partner banks' lending platforms for direct disbursement with accurate, consistent data flow under production load

ERP SYSTEM: HR, FINANCE, INVENTORY MODULES

Laravel, Filament, CodeIgniter, Node.js, MySQL, PostgreSQL, REST APIs, Database Design

- Designed, delivered and implemented core ERP modules covering HR, finance and inventory, including backend logic, database structures and API integrations for workflow automation

OTHER PROJECTS

Full-stack and AI-powered applications

- E-learning platform and Telegram bot automation, built alongside professional work to deepen full stack and system design practice
- AI-powered CV tool, RAG-based experiments, and a personalized recommendation system with a university news feed (final year project)

SKILLS

Backend & Platform: Go, Node.js, PHP / Laravel, Microservices, Event-Driven Architecture, Kafka, Redis, REST API Design & Integration

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Linux, Git, Monitoring & Incident Handling

AI / ML: Python, Credit Scoring Models, RAG, LLM Integration, LangChain, scikit-learn, pandas, Vector Databases, Recommendation Systems

Databases: PostgreSQL, MySQL, Database Design, Query Optimization, Data Integrity Management

ERP: Laravel / Filament, CodeIgniter, Module Development, Implementation & Configuration, POS Integration

Frontend & Mobile: JavaScript, TypeScript, React, Next.js, Angular, Flutter

Reporting: Metabase, Power BI, Excel

EDUCATION

MSc, Artificial Intelligence (Ongoing) *2026 – Present*

Addis Ababa University, Ethiopia

BSc, Software Engineering | GPA 3.84 *2020 – 2025*

Arba Minch University, Ethiopia

ADDITIONAL

Languages: Amharic (Native), English (Professional working proficiency)

Volunteering: Charity Leadership & First Aid Volunteer, AMU Charity (2022 – 2025), certified for leadership in outreach programs focused on education and social impact
